The largest property portfolio in the Arabian Gulf instructs **estateman international**

Abu Dhabi Commercial Properties manages the largest property portfolio in the Arabian Gulf and is a subsidiary of the Abu Dhabi Commercial Bank (65% owned by the Government of Abu Dhabi).

The portfolio comprises a mixture of commercial and residential properties and the requirement has a strong accounting element regarding the payment and receipts of rent. The system provides for 40 concurrent users and Phase I has

recently gone 'live' with Phase II and III to follow shortly.

Stephen Bolton of Estateman says "We are delighted that our first installation in the UAE should be such a major and important instruction. I am particularly pleased with our project team – led by Jeremy Connor – who have worked

extremely hard and who have been very committed to meet the tight deadline on going 'live'."

Denis O'Connor, Chief Executive of Abu Dhabi Commercial Properties comments "We have been delighted not only with the system and its capabilities in supporting our business, but the manner, expertise and dedication the Estateman team brought to the whole process, what is

usually a disruptive exercise, we hardly noticed at all. We hope to have a long and prosperous relationship with Estateman."

Kamal Al Tamini, Head of Support at Abu Dhabi Commercial Properties comments "We considered Estateman because as a fully tested system, we avoided extensive consultancy thus guaranteeing delivery time and removing project risk. We have now commenced on Phase II, confident that the system is flexible enough to meet our requirements."

*Jeremy Connor,
Project Manager*
